How we run Bytes & Bites

- we offer small input to a certain topic
- and practical time where you explore on your own
- + PIZZA!

But:

- all is voluntary, coding on your own is just fine
- B&B as a safe space to work on your code.

Bytes & Bites

Peer support for researchers
and students learning to program!

News: CodeRefinery

Are you interested in learning more about Git / GitHub and reproducible coding methods?

Watch the CodeRefinery stream in your own time and do some of the exercises:

- <https://coderefinery.github.io/2023-09-19-workshop/exercises/>
- <https://www.youtube.com/@coderefinery3414/videos>

News: HPC course

- 07.11.: Blender Basics (online)
- 08.11.: Cluster Computing 1, room WN-C203/C255
- 09.11.: Cluster Computing 2, room WN-F201
- 15.11.: Parallel Python on CPUs, room WN-C203/C255
- 16.11.: Parallel Python on GPUs, room WN-F201
- 21.11.: Blender Advanced (online)
